Justice of the Peace.

REPORT OF HEALTH OFFICER.

For the year ending February 15th, 1913, the following report is respectfully submitted:

There has been no extensive epidemic of contagious diseases during the year. Measles has been the most prevalent of any, and has been confined for the most part to the younger children. Although measles is more contagious than any of our reportable diseases, I believe it is possible so to restrict it that we shall have as few cases of the disease as we now have of scarlet fever or diphtheria.

Our first case of small pox in Proctor appeared last summer. This case was of a virulent type and proved fatal. Fortunately there was no spread of the disease. For this fact great credit is due to the effective help given the health officer by the town authorities. An isolation hospital was established where the case was cared for. All exposed persons were vaccinated, and isolated till the period of incubation was past.

Chicken pox has been somewhat prevalent. This disease is often overlooked by the parents because the constitutional symptoms are so slight. Hence the children are often sent to school while ill with the disease.

In addition to the 42 cases of measles reported, 14 of chicken pox, and 1 of small pox, there have occurred 2 cases of whooping cough, 2 of German measles, 2 of scarlet fever and 2 of diphtheria. From a recent experience with the last-named disease I am convinced that cultures should be taken from the throat of every school child suffering with tonsilitis. Parents should co-operate by calling their physician. They should prefer the inconveniences of a possible quarantine to the possibility of their child transmitting diphtheria to other children.

A negative report was received from the State Laboratory on a section of spinal cord sent there for examination. This specimen was taken from a cow dying from a disease the symptoms of which were not unlike those of infantile paralysis.

The report from the State Laboratory on the cause of death of the large number of fish found in the Creek on July

11th was that the fish were probably electrocuted during the severe thunder storm of the previous day.

Thirty-four dwellings have been placarded for modified quarantine and five for full quarantine. Thirteen dwellings have been partially or wholly fumigated.

There have been issued 23 permits for burial in Proctor cemetery, and twelve for removal to and burial in other towns.

THOMAS H. HACK, M.D.,
Health Officer.

REPORT OF THE CEMETERY COMMISSIONERS.

During the year ending Feb. 15, 1913, there have been four burials in the cemetery.

A small toolhouse with an outfit of tools has been provided for the caretaker and a limited number of trees and shrubs have been planted. The paths have been reseeded and the grass cut during the season.

The entire expense of improvements and maintenance for the year has been \$145.02, which has been paid by Selectmen's orders.

The Commissioners would recommend an appropriation of \$200.00 to be used in planting trees and shrubbery and in the repairs of the driveways, in addition to \$50.00 which will be necessary for the care of the grounds.

The name "Riverside Cemetery" is suggested to distinguish these grounds from the Proctor Cemetery.

G. Z. THOMPSON,
G. H. DAVIS,
C. L. CRAWFORD,
P. J. JOYCE,
SEVIOUS WESTIN,
Cemetery Commissioners.

AUDITORS' REPORT

We have examined the accounts and vouchers of the Selectmen, Overseer of the Poor, and Road Commissioner, also the various accounts of the Town Treasurer, and find the same correct. The financial condition of the town is as follows:

Outstanding Orders 544, 546, 587, 594, 595, 599	\$2,103 50
Order 421, U. S. S. fund	2,158 90
